

Nothing Lifts Like An Oktopus Lifts

Without doubt, Oktopus is the strongest, most versatile panel lifting system around. With capacities up to 600kg and 26m lengths, it outperforms every rival and, thanks to patented suction pads, does so without scratching or damaging panels. It also eliminates many hazardous panel lifting practices at height that could otherwise lead to site accidents and fatalities.

Not only is Oktopus very strong and safe, it's fast too. On site, it has enabled installers to achieve coverage rates of 400 square metres per hour, which is highly impressive productivity. It can lower roofing sheets precisely, manoeuvre architectural cladding vertically or horizontally, and offer ceiling panels upwards. What's more, site experience proves it can handle virtually every make and profile of panel available, even trapezoidal and glass.

So remember, if you're looking to improve site safety and productivity when handling pre-engineered construction panels, nothing lifts like an Oktopus.

CHECKLIST check out Oktopus against the opposition

- Roofing & cladding panels ✓
- 400kg/600kg lift capacity ✓
- 2m-26m plus lengths ✓
- Up to 200mm thickness ✓

- Horizontal & vertical cladding ✓
- All panel profiles & makes ✓
- Up to 400m² coverage per hour ✓
- FR insulation panels ✓

- Industrial doors & glazing units ✓
- Complies with CDM safety regs ✓
- Meets safe handling legislation ✓
- Telehoist/crane mountable ✓

- Optional operator platform ✓
- CE personnel safety certificate ✓
- Eliminates panel damage ✓
- Nationwide training & hire ✓
